

# NV 800 Product List

We understand that our NV800 unit cannot be mounted on the wall in all circumstances.

Our engineering team have now come up with specially designed stands and solutions for you.

These allow flexibility for temporary installations as well as the best possible placement of the devices to maximise their efficiency and performance.

## HX0F-000-00-678 Table Stand

This stylish solution offers safe and secure table top placement for one NV800 unit allowing quick and easy installation of the device.

## HX0F-000-00-834 High Tower Stand

This portable stand can carry one or two NV800 units. It has been designed to allow placement of the devices at optimum position for air flow efficiency. It features three different height adjustments to suit the dimensions of the room and can easily be moved on its lockable wheels.
